

## Thermal imaging device Defender 660L

- **Lens:** 20/60 mm(F1.0)
- **Resolution:**640x512
- **Magnification:** 1.1X/3.2X
- **Field of View (FOV):** 21.7°x17.4°/ 7.3°x5.9°
- **NETD:** ?20mk

- **Battery:** Operating time ? 12 hours
- **EAN** 5907167356115

Rating: Not Rated Yet

**Price**

5886,00 €

## Description

The Defender thermal imaging system is one of the most advanced tools for hunting operations, combining advanced technology and reliability. Thanks to its unique capabilities, this system provides exceptional functionality and precision in the most difficult conditions. The main advantages of this complex are:

1. **Maximum sensitivity to thermal signals:** With a NETD of  $\approx 20\text{mk}@300\text{k}$ , the system detects even the slightest temperature changes, allowing you to get a clear and detailed image even in complete darkness.
2. **Magnification for different distances:** Smooth and fast zoom from 1.8x to 5.5x allows you to effectively observe objects at different distances while maintaining high image quality and shooting accuracy.
3. **Reliability and security:** The device is designed to operate in extreme environments and is IP67-rated, which provides resistance to water, dust, and mechanical damage. It also operates in a wide temperature range from  $-25^\circ$  to  $+55^\circ$ .
4. **Innovative features for combat missions:** The ballistic calculator, LRF rangefinder at 1200 meters and auto-firing function allow for high precision. The CSFBC system and GEO dot function provide additional tactical advantages.
5. **Long battery life:** The built-in rechargeable battery provides up to 16 hours of continuous operation, allowing for extended operations without the need for frequent recharging.
6. **Data storage and processing:** The device is equipped with 64 GB of memory for storing photos and videos, and supports data transfer via Type-C port, which makes it easy to use and process information.
7. **Compact and convenient design:** The complex has a compact size of 379x100x110 mm and is easy to transport, making it convenient for use in the field. Thanks to the standard Picatinny rail, the device can be easily integrated with other accessories.

The Defender thermal imaging system is the best choice for professionals who require precision, reliability, and efficiency in the performance of hunting missions.
